

Department of Computer Applications.
5th Sem MCA –MINI PROJECT
Aug-Dec 2019

Synopsis

Project Title: Bulk email aggregator

Abstract: A **Software as a service (SaaS)** web application that can be used to send mass emails to a big list of users for collecting feedback. The objective of the project is to provide a paid service to the end user, which will enable them to send bulk emails for feedback of their own product. Our service will be provided on usage of assigned credit points to user. With the use of Google OAuth authentication, we will enhance the authentication flow in the app.

Software Requirements:

- Front End: HTML5 & CSS3(Bootstrap V4.2.1)
- Back End: Node.js v11.8.0, Express.js v4.x, React.js v16.x
- Database: MongoDB v4.0.1
- Deployment: Heroku Cloud, MLab MongoDB Cloud

Hardware Requirements:

- OS: Windows, Linux and MacOS
- Processor: Pentium Dual-core and above CPU's
- RAM: 1GB and above
